Rev20220601

EB1

Characteristics:

EB1 Exhalation Barrier Bracket with a sectioned air chamber for excellent flow distribution and held by the RPF1 retainer.

Application:

Exhalation area protection for the safety of others and clean surfaces where viruses and bacteria can be spread in droplets released by sneezing, coughing, talking, or other actions.

Use Restriction:

- Only compatible with the S950 half-mask respirator.
- Recommended for use to avoid spreading COVID-19.
- Do not use it for protection from impact or UV radiation.

Material:

- EB1 Filter Media: Electrostatically charged polypropylene.
- EBS1 Bracket: ABS.
- RPF1 Retainer: Polypropylene.
