AIR A200

FILTER ADAPTER

ACCESSORY

Product Description

AIR A200 adapter for combining AIR F200 series particle filters with AIR F600 series chemical filters.

airsafetycompany.com

Rev20230201

Characteristics

- Manufactured in polypropylene with elastomeric gasket.

Application

Used for the combination of AIR F200 series particle filters with AIR F600 series chemical filters, resulting in a combined filter for all types of particles as well as for gases and/or vapors, depending on the AIR F600 series chemical filter to be used.

Use Restriction

- This adapter and the combined filters do not supply oxygen. Use in well-ventilated areas without oxygen deficiency and that do not contain explosive atmospheres.
- Do not use in environments where the concentration level of the contaminant is Immediately Dangerous to Life or Health (IDLH).

Certification

This adapter is used for combining filters under standards EN143:2000+A1:2006 and EN14387:2004+A1:2008.

Material

- Body: Thermoplastic.
- Gasket: Elastomeric foam.
