

# AIR FFS990

REUSABLE RESPIRATOR

## Product Description

**AIR FFS990** series full-face respirator, with face seal, nose cup, and silicone harness. Anti-fog visor and MAX FLOW valve. Available in three sizes: small S, medium M, and large L.

**FULL FACE / SILICONE**

## Characteristics

- Face seal, nose cup, and silicone harness.
- Polycarbonate visor with anti-fog and anti-scratch treatment.
- MAX FLOW exhalation valve, which efficiently reduces temperature, humidity, and CO2 content inside the respirator. Protected with a vertical descending flow cover.
- Four-point harness for a safe, fast, and easy adjustment.
- Bayonet connection compatible with all AIR filters.

## Application

Airway protection from inhalation of solid particles, liquid particles, gases, and vapors when used with proper mechanical/electrostatic, chemical, or combined filters.

## Use Restriction

- This respirator does not supply oxygen. Use in well-ventilated areas without oxygen deficiency and that do not contain explosive atmospheres.
- Do not use in environments where the concentration level of the contaminant is Immediately Dangerous to Life or Health (IDLH).

## Certification

EN136:1998. According to Regulation (EU) 2016/425 regarding personal protective equipment.

## Material

- Facepiece, nose cup, and harness: Silicone.
- Visor: Polycarbonate.
- Color: Gray / Red.
